

Action plan submitted by Vesile Uslu for Tes-iş Adapazarı Anadolu Lisesi - 02.01.2023 @ 19:38:15

**By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.**

## Infrastructure

### Technical security

- It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at [www.esafetylevel.eu/group/community/protecting-your-devices-against-malware](http://www.esafetylevel.eu/group/community/protecting-your-devices-against-malware).

### Pupil and staff access to technology

- All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at [www.esafetylevel.eu/group/community/use-of-removable-devices](http://www.esafetylevel.eu/group/community/use-of-removable-devices) to make sure you cover all security aspects.
- Ensure that the policy on mobile phones is being applied consistently throughout the school. Take a look at the fact sheet on Using Mobile Phones at School ([www.esafetylevel.eu/group/community/using-mobile-device-in-schools](http://www.esafetylevel.eu/group/community/using-mobile-device-in-schools)).
- It is great that in your school laptops/tablets are easily accessible within a lesson. Using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

### Data protection

- It is good that your school provides materials on the importance of protecting devices, especially portable ones. Ensure that staff are aware of these and use them. This material should be pointed out to new staff as part of their induction. Please consider uploading those as evidence at [evidence](#) and sharing with others in the forum. Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- It is good that your school records are stored in a safe environment, it is also necessary that they are archived and disposed with in line with the Data Protection Act. Ensure that a good records management system is put in place. Check the according fact sheet for more information.

- › You have a good policy of encrypting pupil data and storing it safely. Ensure all new staff made aware of the procedures for encryption and data handling and that there is a named point of contact acting as the data controller for your school. Upload to your school profile some guidelines about protecting sensitive data through an encryption system so that other schools can benefit from your experience.

## Software licensing

- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.
- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

## IT Management

- › In your school only the head master and/or IT responsible can acquire new software. Consider putting a system into place where teachers can ask for new software in a non-bureaucratic and timely fashion. This allows teachers to create a more engaging lesson without the temptation of unauthorized copying and its inherent dangers and costs.

# Policy

## Acceptable Use Policy (AUP)

- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › In your school policy issues are regularly discussed. This is good practice as it ensures staff and pupils are aware of them. Do pupils and staff also have to sign related documents to confirm their awareness?
- › It is essential for all schools to have an Acceptable Use Policy (AUP) for staff and pupils. Consult with all stakeholders to draw up an AUP urgently. See the fact sheet and check list on Acceptable Use Policy at [www.esafetylevel.eu/group/community/acceptable-use-policy-aup-](http://www.esafetylevel.eu/group/community/acceptable-use-policy-aup-).

## Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › Keep a central log of any cyberbullying incidents which will help to inform staff about the extent of any potential issues and the type of pupil, age etc. that are affected. Also, be sure that you fill in the eSafety Label [Incident handling form](#). Your input will contribute to building a data base of successful incident-handling practices from schools across Europe that you can use in the future.

## Staff policy

- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.
- › Ensure that all staff, including new members of staff, are aware of the policy concerning online conduct. This should be a topic that is regularly discussed at staff meetings and clearly communicated in the School Policy, and to staff and pupils in the Acceptable Use Policy. Regularly review and update both documents as necessary.
- › Ensure that all staff understand the school's regulations on use of personal mobile devices in the classroom; these should be clearly communicated in the School Policy. Monitor the effectiveness of the policy and ensure that it is adhered to. You can also advise your staff to read the fact sheet Using mobile phones at school ([www.esafetylabel.eu/group/community/using-mobile-device-in-schools](http://www.esafetylabel.eu/group/community/using-mobile-device-in-schools)).

## Pupil practice/behaviour

- › It is good that pupils have the possibility to shape school activities when discussing eSafety, be it extra-curricular and curricular ones, based on what is going on in their daily lives. This way they will be more engaged and it also allows the teacher to recognise real life issues.

## School presence online

- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

# Practice

## Management of eSafety

- › In your school, teachers are responsible for their own pupils' online activity. There are many network security and user privacy, audit and procedural tool checks and balances that need to take place to ensure the safety of your pupils and the school networks, and these should be laid down in your School Policy. See our fact sheet on School Policy at [www.esafetylabel.eu/group/community/school-policy](http://www.esafetylabel.eu/group/community/school-policy).

To ensure this happens as efficiently and often as necessary, we advise that the Principal of your school appoints one individual staff member to look after eSafety management in the school. This person will be responsible for seeing that all aspects included in your School Policy are discussed and looked at with other teachers as well as with pupils in the classroom.

To ensure that every staff member, pupil and parent is aware of her or his online rights and responsibilities, see the fact sheet on Acceptable Use Policy ([www.esafetylabel.eu/group/community/acceptable-use-policy-aup-](http://www.esafetylabel.eu/group/community/acceptable-use-policy-aup-)).

- › Appoint a person who will have overall responsibility for eSafety issues. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at [www.esafetylabel.eu/group/teacher/incident-handling](http://www.esafetylabel.eu/group/teacher/incident-handling).

## eSafety in the curriculum

- › You may want to consider including sexting in your child protection policy to help to ensure a consistent whole-school approach to dealing with any incidents.
- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).

## Extra curricular activities

- › Use Safer Internet Day as a mechanism to get the whole school community involved with online safety. The information and resources available at [www.saferinternetday.org](http://www.saferinternetday.org) offer an ideal opportunity to promote peer advocacy activities.
- › It is good that you provide eSafety support for your pupils outside curriculum time when asked. Consider offering all pupils support to deal with online safety issues. It may be helpful to provide a "surgery" to help pupils to set their Facebook privacy etc. The eSafety Label portal provides resources that will be useful for this; check out the fact sheet on Pupils' use of online technology outside school at [www.esafetymal.eu/group/community/pupils-use-of-online-technology-outside-school](http://www.esafetymal.eu/group/community/pupils-use-of-online-technology-outside-school).

## Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at [www.esafetymal.eu/group/community/information-for-parents](http://www.esafetymal.eu/group/community/information-for-parents) to find resources that could be circulated to parents and ideas for parent evenings.

## Staff training

- › It is important that teachers are aware on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. Ensure that all teachers are provided with information of this. Have a look at the [Essie Survey of ICT in schools](#).

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.**
